

# What Is The Best Water To Drink?

Your body is over 70% water. You depend on water for your very existence. Water increases endurance and energy, aids digestion, regulates body temperature, and facilitates muscular and nervous activity. It's the perfect medium to deliver essential nutrients, oxygen, and disease-fighting antibodies to the cells. And, when the body is properly hydrated, it's better able to get rid of waste products.

The water available from your kitchen tap has traveled through many miles of pipe and earth. In this journey, it picks up thousands of microscopic impurities like pesticides, industrial chemicals, and toxins. Some tap water even includes things like chlorine and fluoride, which can be harmful to your body. Tap water and well water both vary tremendously around the country.

It is vitally important to your well being that you drink the purest water possible.

## Four Options

The four basic options for purified water are:

1. Distilled Water
2. Reverse Osmosis Water
3. Bottled Water
4. Home Filtered Water

For most people the home filtered water option seems to be the best choice. Many brands are simple devices that just attach to a faucet or that you pour water through. They are usually carbon filters and are effective if the filters are changed regularly. Usually the water from these filters tests neutral to slightly positive.

We have recently found a water filtering device that seems to be much better than other methods of purifying water. It is called the ***R-Garden Pure Water System***. It requires neither electricity nor water pressure to operate. You pour the water into the top and the water passes through the filter by the force of gravity at a rather slow speed to ensure proper absorption. The ***R-Garden Pure Water System*** not only filters and cleans the water but also adds some energy to the water so that when it comes out, the water generally tests very positive.

Below is a further explanation of the components and benefits of the ***R-Garden Pure Water System***.

## Eight Benefits of Using a Water Filter

- 1) Clean, filtered water helps protect the body from disease and can help to maintain good health and vitality.
- 2) Removes harmful contaminants like chlorine and bacteria, which can reduce the risk of health problems.
- 3) Generally, filtered water tastes and smells better than tap water.
- 4) Removes lead from drinking water, which is especially important for pregnant women and the developing immune system of children.
- 5) Provides water that costs much less than bottled water.
- 6) Provides safe, healthy water for cooking.

- 7) Removes harmful contaminants without removing healthy minerals and changing the pH balance of the water.
- 8) Helps protect the body from the 2100 toxins that may be present in tap water.

## How You Can Get Healthy Water For Pennies A Day!

Are you looking for a low-cost way to drink the purest water possible? We know that many of you are concerned about the purity of the water you drink. And, for those of you using the *Vitalizer Plus*, having a good source of pure water is vitally important. Well, we have discovered a new gravity water filtration system – ***the R-Garden Pure Water System***. Here are some of the features that make this product unique:

### Multi-layers of Filtration

This unique water filtration system utilizes multiple layers to remove sediment, chlorine, rust, bacteria, heavy metals, and those nasty organic chemicals (trihalomethanes (THM's), polychlorinated biphenyls (PCB's) and pesticides), detergents, and other pollutants by allowing water to flow through 4 different filtration layers. Gravity, rather than forced flow, maximizes filtration time and allows water to migrate naturally

through multiple layers of filtering media. Slow, gravity-controlled water percolation encourages natural spiraling of the water which adds energy as contaminants are removed.

### Ceramic Pre-filter

The first stage of filtration occurs as the water passes through the ceramic pre-filter. This is where rusts and other particulate matter are removed. The ceramic filter captures sediment, removing particles and pollutants down to .3 microns in size. The ceramic filter can be washed – extending its life up to one year – depending on water quality.

Next the water enters a multi-layered filter where most of the filtration work is done.

### Activated Carbon Filter

Carbon is one of the best and most widely-used filtering materials incorporated in quality water filtration devices. Activated carbon increases the surface area of the carbon for greater adsorption of contaminants – including THM's, PCB's and pesticides. Activated carbon fibers are highly effective for the removal of chlorine, organic chemicals, odors, and pigments from the water.

KWLF0107

### Mineral Bead Layer

This special filtration layer incorporates coral sand (coral calcium), tourmaline (negative ions), and other bio-available minerals to naturally alkalize the water and improve taste.

### Silica Sand Filter

Silica sand, (quartz) is pure crystalline sand – the most common mineral on the earth’s surface. Silica sand has been used in water filtration systems for many years to put the finishing touches on clean water.

### Natural Conditioning

The next stage of treatment exposes the filtered water to ionic minerals which helps to further improve the quality of the water.

### Mineral Stones

After filtration, water passes over a bed of mineral stones called “Silver Stone.” These special stones are collected from 1000-2000 ft below sea level in unpolluted oceans. Silver Stone slowly releases oxygen and over 20 different ionized minerals into the water to help balance the pH.

### Magnetic Restructuring – The Final Stage

Earth’s magnetic fields restructure water, organizing large molecular water conglomerates into smaller structures that are easier for the body to assimilate. As water is dispensed from the holding tank, it passes

through a magnetic field which helps to re-organize the molecular structure for water your body will love!

## An Excellent Water System At A Great Price!

We are pleased to introduce one of the best water filtration systems on the market – *the R-Garden Pure Water System*. This remarkable water purifier is all you’ll ever need to produce great tasting water, free of harmful contaminants. You can purchase the *R-Garden Pure Water System* at a great price of just **\$169.00 (US Funds)**. That is much cheaper than other comparable brands on the market.

### 100% Risk Free Guarantee!

What’s more, your complete satisfaction is guaranteed. If you are not absolutely delighted with the *R-Garden Pure Water System* ... if you are not totally convinced that your water tastes and smells better, simply return the unit within 90 days of purchase in its original packaging for a full and prompt refund (less shipping/handling charges). *No hassles. No questions asked!*

**Call 1-800-800-1927 to order your R-Garden Pure Water System today or fill out the order form below and mail or fax it to us.**

**Great Tasting Water, Just \$169.00!**

# NO RISK ORDER FORM

**YES!** I want to have great tasting water, free of odors and harmful contaminants. Please rush me the *R-Garden Pure Water System* for just **\$169.00 + \$10.00 S&H (US Funds)**. (WA residents please add \$13.60 sales tax)

**Please charge my (check one):**

VISA  Master Card  AMEX  Discover

Card No.: \_\_\_\_\_ Expires: \_\_\_\_/\_\_\_\_/\_\_\_\_  
(mm/yy)

Name on card: \_\_\_\_\_

Signature: \_\_\_\_\_ Phone No.: \_\_\_\_\_

**My check or money order is enclosed (US Funds):** \_\_\_\_\_  
(WA state residents please add 7.6% sales tax).

Please provide your R-Garden ID number and shipping address.

Name \_\_\_\_\_ ID No. \_\_\_\_\_

Address \_\_\_\_\_

City \_\_\_\_\_ ST \_\_\_\_\_ ZIP/Postal \_\_\_\_\_

### YOUR Satisfaction Is 100% Guaranteed!

I want you to be completely satisfied with your purchase of the incredible *R-Garden Pure Water System*. If for any reason you want to return it, I will give you a fast, no-questions asked, 100% refund (less S&H charges). Simply return it to us within 90 days of purchase in its original packaging.

### THREE EASY WAYS TO ORDER

1. Call TOLL-FREE 1-800-800-1927 for faster delivery.
2. FAX completed order form to 1-888-600-9257.
3. MAIL this form with full payment to:

**R-Garden**  
PO Box 417  
Kettle Falls, WA 99141-0417

**Experience The Pleasure of "Great Tasting Water"... Order Your Pure Water System Today!**
